

# LLF14.300 TECHNICAL SPECIFICATION & FEATURES

#### INTRODUCTION

Designed to meet the superior Australian Standard for mobile elevated work platforms, this model has been designed predominantly for live line work, street line maintenance and tree clearing. Based on the popular LLF16.350, this model shares many common components.

A robust construction made to withstand the harsh Australian environment, the MEWP has been designed with serviceability in mind.

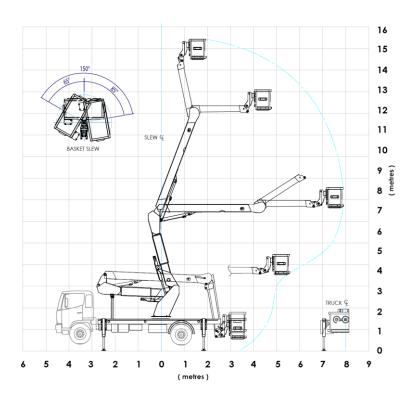

The boom configuration has been tailored to maximise the working envelope, ensuring the operator can safely manoeuvre with ease. For protection against electrical hazards, the unit features a 33kV chassis insulator and a 132kV insert in the fly boom. Furthermore, the special coating applied to the fibreglass surfaces on the inside and outside of the components permits 33kV wet protection throughout the life cycle of the unit.

For more information please visit www.gmj.com.au

Proudly designed and manufactured in Australia

## **TECHNICAL SPECIFICATION & FEATURES**

OPERATING SPECIFICATION		
Model	LLF14-300	
Boom configuration type	Articulated / fly	
Safe working load	300 kg	S
→ With basket rotator	300 kg	0
Basket construction	Fibreglass - Flame retardant to ASTM D635	
Working height	16.0 m	
Floor height	14.5 m	
Reach	8.5 m	
Relevant conformance standard	AS/NZS 1418.10:2011 – Mobile elevating work platforms	
Cab chassis requirement	4.8 m, 12,000 kg GVM	
	5.0 m – With basket rotator	

OPERATING SPECIFICATION	ON CONT.	
Mass of unit includ. tray body	5,500 kg – Approx	
Travel height	3.6 m - Approx	
ightarrow Insulation specif	FICATION	
Chassis insulation rating	33 kV - Dry	S
	33 kV - Wet	0
Basket operator insulation rating	132 kV - Dry	S
	33 kV - Wet	0
Chassis insulation effective length	0.5 m	
Basket operator insulation effective length	2.0 m	
Low voltage insulation	All metallic portions about 4.5 m	
ightarrow Stabilisation		
Front type	Hydraulic up/down	
Rear type	Hydraulic up/down	
Spring lockouts	No requirement for stabiliser legs to be deployed. Allows restricted slew from the stowed position	0
Automatic stabilisation	Automatic stow/engage & level at the touch of a button	0
Max. stabiliser spread	2.5 m	
Ground penetration	0.25 m	S
	0.40 m	Х
Max. operating chassis slope	±5°	
Max. stabiliser load	100 kN (10,000 kg) – Per pad	
Max. operating wind speed	12.5 m/s (45 km/h)	
Level indicators	3 off visible at stabiliser controls	S
ightarrow Boom performan	CE	
Slew	Continuous 360°	
Lower boom	1.5° → 77°	
Upper boom	-11° → 75°	
Fly boom	-90° → 45°	

S STANDARD O OPTION X NOT APPLICABLE PAGE 3 OF 7

#### **TECHNICAL SPECIFICATION & FEATURES**

OPERATING SPECIFICATION	N CONT.	
ightarrow Boom speeds		
Slew ±360°	90 – 100 sec	
Lower boom – Raise/lower	35 – 45 sec	
Upper boom – Raise/lower	30 - 40 sec	
Fly boom – Raise/lower	20 - 25 sec	
ightarrow Safety features		
Emergency stops	Emergency stops located at all control locations with indication light to illustrate when active	s
Over centre valves	O/centre valves fitted to all cylinders to prevent unintended movement in the unlikely event of hydraulic hose failure	S
Basket tilt	Basket tilt function to allow retrieval of injured personnel in the event of emergency use	S
Boom/Stabiliser interlock	Boom/stabiliser interlock to prevent the operation of the booms without the stabilisers safely engaged	S
Basket tie down interlock	Prevents the ability to pack up the stabiliser legs unless the basket is correctly tied down and the boom fully stowed	0
Back-up retrieval systems	Auxiliary manual controls located at the base	S
	Electro-hydraulic power pack	S
	Hand pump back-up for all booms and stabilisers	S
	Manual bleed down screws fitted to cylinders for manual retrieval	S
	Controlled decent devices fitted to the basket for each operator	S

#### **FACTORY OPTIONS**

FACTORY OPTIONS		
→ MOTION CONTROLS		
Basket controls	Pilot pressure joystick	S
	Single pistol grip	0
→ Radio remotes (Single)	Autec	0

FACTORY OPTIONS CONT.		
→ Radio remotes (Dual)	Remote option also available in dual controls	0
Basket slew control	Inbuilt into remote & basket controls	0
Auxiliary base controls	Manual controls located at the pivot frame	S
	Spool positioning	0
Stabiliser controls	Location customer specific	S
Engine stop / start	Located at the basket & pivot frame (other locations avail.)	S
→ BASKET		
Basket construction	Fibreglass - Flame retardant to ASTM D635	S
	Non-slip grit type on internal/external access steps	S
Basket size (internal)	1.2 m (wide) x 0.7 m (long) x 1.0 m (high)	0
	1.35 (wide) x 0.65m (long) x 1.0m (high)	S
	1.5 m (wide) x 0.7 m (long) x 1.0 m (high)	0
Basket articulation	0° - Fixed	S
	150° - Helical rotary actuator	0
Basket liner	Flame retardant to ASTM D635 - Includes 2 internal access steps	0
Basket accessories	Lifting jib attachment - 150 kg SWL	0
	Ribbed vinyl basket cover	0
	Fibreglass removable tool tray	0
→ HYDRAULICS		
Hydraulic circuit	Closed centre	0
	Open centre	S
Hydraulic operating pressure	17 MPa	S
Hydraulic pilot pressure	3.5 MPa	S
PTO & Pump (Gear type)	Single displacement - Single (Closed centre)	S
	Single displacement - Tandem (Hydraulic tools)	0
Accumulator size (Closed centre)	37L	S
	50L	0
Hydraulic tank	140L - Capacity	S
	Sight glass with temperature gauge	S
